

Senior Consultant in Technical Risk Assessment (m/f/d)

📍 remote

€ ab 75.000,-

AO11478

Our client, an **established and globally operating consulting company** for more than 20 years, is an expert in risk assessment of industrial plants as well as operational risk management and combines stability with creativity!

For the constantly growing company located in 1010 Vienna we are looking for an

Senior Consultant in Technical Risk Assessment (m/f/d)

to strengthen the successful consulting team in advising industrial clients in risk-related matters! Our client offers you the opportunity to further develop your existing expertise alongside the risk management experts in order to be able to competently represent the company as a consultant in long-term projects.

Your tasks:

- Customer support throughout the entire project life cycle
- Analysing industrial plants and processes
- Quantifying risk potential using the in-house system
- Support in the development and implementation of control measures
- Moderation of workshops

Your profile:

- Completed studies with a **focus on technology** (industrial engineering, mechanical engineering, electrical engineering, physics) or comparable qualification or
- Experience in the field of **industrial plant** construction, facility management or comparable tasks and areas
- Experience in **risk analysis and assessment** is an advantage
- Knowledge of **fire protection** is an advantage
- Confident appearance and good negotiating skills
- **Fluent in written and spoken English (C1)**
- Structured approach and willingness to learn
- **Willingness to travel** (between 30% and 50%)
